

Recycling leads to happy penguins

10 tips to help you recycle

1. Turn off the water while brushing your teeth
2. Take shorter showers to save water
3. Recycle plastic bags at your local supermarket
4. Use less paper towels and napkins
5. Write on both sides of your paper instead of one
6. Recycle cans, bottles, plastics and paper
7. Use a reusable lunch box instead of paper bags
8. Donate or sell old items instead of throwing them away
9. Use old materials in your craft projects
10. Tell friends and family what they can do to help

How does recycling help penguins?

Recycling can help to solve the problem of global warming. Global warming means that the earth's temperatures are rising. Because the earth is getting warmer, ice is melting and the penguins' home is disappearing. By recycling, we can help to save the penguins' habitat and make them healthy and happy again.

Who else is helping?

Teams of researchers at CReSIS, or The Center for Remote Sensing of Ice Sheets, study glaciers and ice. They hope to predict and prevent the harm of global warming. To learn more visit www.cresis.ku.edu.
