

# POLAR BEARS HAVE FEELINGS TOO

global warming is melting the ice caps that they inhabit. what can you do to help?

[Change the world. Change your life.](#) At CReSIS we are thinking about the future. Have you thought about yours? Make CReSIS a career. The Center for Remote Sensing of Ice Sheets (CReSIS) is a science and technology center established in 2005 with the mission of developing new technologies and computer models to measure and predict the response of sea level change to the mass balance of ice sheets in Greenland and Antarctica.

CReSIS provides students and faculty with opportunities to pursue exciting research in a variety of disciplines; to collaborate with world-class scientists and engineers in the US and abroad; and to make meaningful contributions to the ongoing, urgent work of addressing the impact of climate change.
